WIDE FORMAT ARCHIVAL PRINTMAKING • FINE ART REPRODUCTION • FILM SCANNING • PHOTOSHOP TRAINING

Giclee Prints:

We carry a variety of archival, matte and gloss finish papers and canvases by Hahnemuhle, Epson, and Lexjet delivering museum-quality results. Print pricing is based on the square footage of the finished print, priced at **$22 per square foot for all substrates**. You can use the formula below to calculate your price:

[(length" x width") / 144] x $22 = Print Price

Using that pricing, some sample results based on common frame sizes are:

$12.32 for an 8"x10"
$23.54 for an 11"x14"
$48.84 for a 16"x20"
$120 for a 24"x36"

All prints are made on roll stock and custom cut to your exact size specification. The maximum print size is 44" x 90". All prints have **10 minutes of free file prep** included in their price. If more prep is required that time is billed at the graphics time fee of $25 per fifteen minutes.

In most cases 8x10 is the minimum print size offered. A 10% discount is applied when printing ten or more of the same print (same size) in a given order. Orders may be picked up at the studio or sent through the mail with an added S&H cost.

Art Reproduction:

Not all digital art reproduction is created equal. It's an art unto itself and we are committed to be as picky about your colors and details as you are. Even the best studio photography or scan will still vary from how you see your art, but we have the tools to turn "pretty close" to "museum grade".

Our **art repro prices are based on the longest side of the original art** and include all the time and proofing needed to make the result match your high standards. You are an integral part of that process and it's not done until you're happy. If your originals contain metallic finishes an added $40 fee applies.

You get copies of the finished files in a convenient format. Files are also kept in our archive so you can easily ask for re-orders of your previous works. The Art Reproduction prices are below:

Original up to 11" wide: $80
Original up to 24" wide: $130
Original up to 30" wide: $155
Original up to 36" wide: $205
Original up to 48" wide: $255
Original up to 54" wide: $305
Original greater that 54" wide: quote

Flatbed Scans:

We can create flatbed scans from film (positive or negative) or physical media. Price is $10 per scan, plus $5 per digital stitch (required if original is greater than 8.5"x11" in size) if needed. The results can be saved to a portable USB or hard drive for FREE, or can be burned to disc for $5 (gold-based DVDs for better archiving). If clean-up or color adjustment is needed, that is available at the studio's graphics rate of $25 per fifteen minutes.

Print Extras:

Simulated deckle edge prints can be applied using a deckle ripper. Each deckle edge adds $1 to the square foot price, so if you order a print with four deckled edges, it gets priced at $26 per sq. ft. ($22 + $4).
